

ABHISHEK GUDA

Hyderabad, India | +91 93475 85909 | abhishekguda40@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL OBJECTIVE

Final-year B.Tech student in AI & Data Science with hands-on experience building end-to-end analytics pipelines using Python, SQL, Excel, and Power BI. Completed the Deloitte Australia Data Analytics Job Simulation and earned HackerRank SQL (Basic & Advanced) certifications. Equipped to translate complex datasets into actionable business strategies — from raw SQL queries to executive-ready dashboards.

EDUCATION

B.Tech in Artificial Intelligence and Data Science

Nalla Malla Reddy Engineering College, Hyderabad | 2023 – 2026

Relevant Coursework: Machine Learning, Data Structures, Database Management Systems, Statistics, Data Mining, Business Intelligence

TECHNICAL SKILLS

Programming: Python, SQL

Visualization: Power BI, Microsoft Excel, Matplotlib

Libraries: Pandas, NumPy

Databases: MySQL, SQLite

Analytical Skills: Data Cleaning, EDA, Business Intelligence, Dashboard Design, SQL Joins, Aggregations & CTEs

EXPERIENCE

Data Analytics Virtual Intern | Deloitte Australia via Forage | 2026

- Investigated complex business datasets to identify operational inefficiencies, mirroring Deloitte's real consulting workflow across multiple business units
- Built Excel-based analytical models to classify and quantify data anomalies, reducing manual investigation time
- Synthesised findings into a structured business report with targeted recommendations for resource reallocation, resulting in a clear action plan for leadership

PROJECTS

End-to-End Superstore Business Intelligence Project — SQL · Excel · Power BI | 2026

- Phase 1 — SQL: Engineered optimised queries using CTEs, Joins and Aggregations to clean and segment 9,000+ records across 49 states, eliminating manual preprocessing
- Phase 2 — Excel: Built a 3-chart PivotTable dashboard tracking Sales by Region, Category and Customer Segment for at-a-glance performance monitoring
- Phase 3 — Power BI: Delivered a 4-visual interactive dashboard revealing the West region (\$710K) as the top revenue driver and Technology as the highest-grossing category
- Business recommendation: Identified a \$321K revenue gap between West (\$710K) and South (\$389K) regions; recommended a 15% reallocation of marketing spend toward the South's Consumer segment
- GitHub: [Superstore-sales-dashboard](#)

Movie Industry Data Analysis — Python · Pandas · Matplotlib | 2026

- Orchestrated an end-to-end EDA pipeline on 7,600+ movies using Python and Pandas — imputing 1,200+ missing gross revenue values, engineering a profit-margin feature, and uncovering that budget alone explains only 54% of box-office variance
- Built 3 Matplotlib visualisations revealing genre distribution, IMDb score trends and year-on-year production growth
- Key insight: Comedy dominates volume (2,300+ films) while Action commands the highest average IMDb rating; signalling a divergence between popularity and critical quality
